TO WHOM IT CONCERN

Tarstone Road Maintenance are engaged by Dublin Port Company on an ongoing basis. This work is carried out in busy port areas and they always employ traffic management to suit and operate with consideration for port operations. Over the years, a number of these projects covered joint infill to both large and narrow joints in concrete pavements.

I have found Tarstone services and workmanship to be very satisfactory and finished to a high quality. I would not hesitate to recommend Tarstone for any similar project.

Yours faithfully,

Garrett Dorman,
Capital Programme Director.
