To whom it may concern

Re: Tarstone Road Maintenance

L&M Keating together with our JV Partners Roadbridge Ltd are presently undertaking major infrastructural projects on behalf of Dublin Port Company. Tarstone Road Maintenance has been engaged by the JV to carry out works on their behalf within the Port.

This work is carried out in busy port areas and requires in conjunction with the various stakeholders the design and implementation of various traffic management plans.

Tarstone scope of works includes repairs to concrete pavements and covers joint infill to both large and narrow joints.

We have found Tarstone to be a well-managed and efficient company. All works are carried out to a high standard and finished to a high quality.

We would not hesitate to recommend Tarstone for any similar project.

Yours Sincerely,

Michael Reale
